M-APPS CLUB

PRESENTS

"Let's Build IT 2021"
on
15.03.2021 - 17.03.2021

TRAINING PROGRAM ON MOBILE APPLICATION DEVELOPMENT
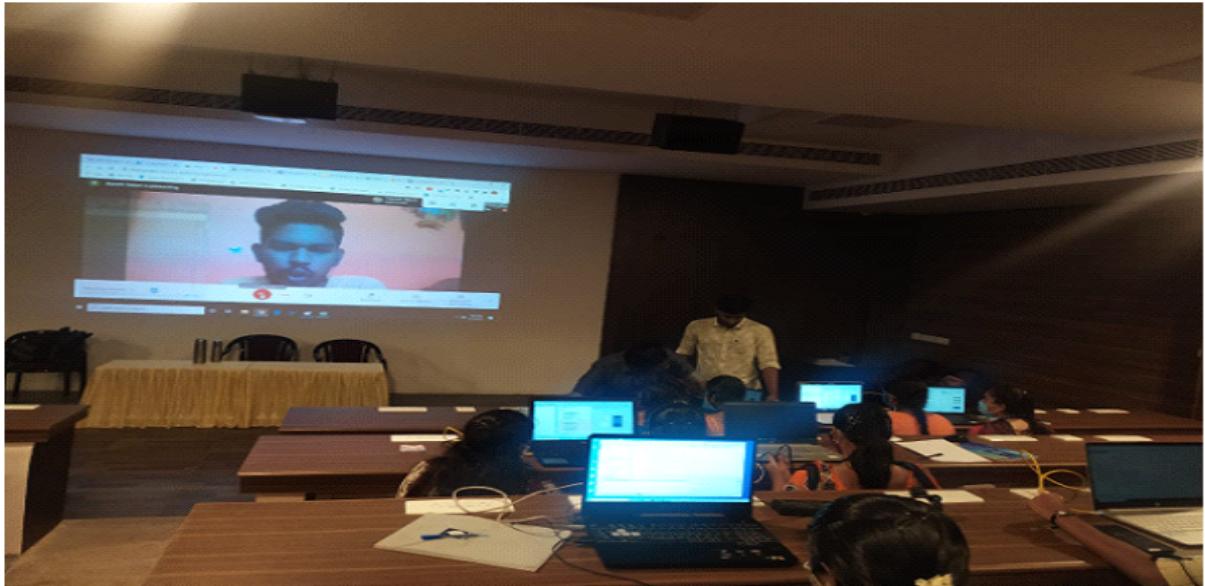

Run-through:

The M-apps club conducted a training program on mobile app development for 3 days (15-03-2021 to 18-03-2021) called "Let's Build IT 2021" for our college students.More than 80 students participated and benefited through this program. 30 teams, with 3 members in a team from first year and second year of various departments participated in the training program to learn Android Studio.The main aim of the event is to train the students to develop android applications with the help of seniors and experts from industries. Participants were guided thoroughly throughout the event. We have attached the details of the event along with Topic covered, Photographs and Student Feedback in this Document

Day 1: 15.3.2021

Mr. Rahul Gunasekaran, Security consultant, Synopsis USA. Delivered a session on Mobile application development basics.

Day 2: 16.3.2021

Mr.Bharath Sekar, Software Engineer, Zafin labs, gave a good insight about Database connectivity and layouts.

Day 3: 17.3.2021

Mr. David Peter, Triumphal Tech Solutions, gave an insight about end to end product development and revenue generation.

Winning Teams

The students Developed Mobile Application with the help of seniors and most of them came up with good outputs. Below are the photos of the winning teams. Each team was appreciated with a cash award of Rs.500.

Valedictory Function. 17.3.2021 Photos

The cofounders of Mentor Mr.Santhosh Eswaran and Mr.Meeran were the guests for the valedictory function.

Feedback-Let's Build IT 2021

Training program on mobile app development
(15/03/2021-17/03/2021)

M. Mohamed Ajaf

It was a nice experience, good going with seniors, loved ones. Amazing and need more like this in future. They taught whatever we asked by sitting with us in our language.

Parvathi priya nandana K M

The workshop was really awesome, fun and helpful in all aspects....mainly the trainers who helped a lot in making an app up which we have created. Thank you!!.

Harini.R

A knowledge-gaining event overall!Thanks to Balaji senior and Suganth senior.Bcoz they were the ones who helped us a lot. And thanks to Krishnan senior he has also given some guidance for our other ideas and how to proceed with them.

Tejashree D

This is the best workshop I ever attended. Learned a lot from scratch. Entering into the hall without zero knowledge and now went out with confidence and knowledge to create at least a basic app is so cool! Thanks to the trainers and specially Balaji Anna for helping us out ! .

Dwaraknath K

It was really a great experience from being a normal coder to a developer that too mobile application developer. All the trainers were really helping us and every team by putting in their utmost efforts.

Karthik B

It was a great experience for getting a prize in the very first event in which I have used android. You could have explained different methods and techniques!

Santhosh sivan

Very useful looking forward to participating in more events like this. Maybe give an overview of Java and XML before blankly asking us to create an app(for beginners and 1st-year students)

Yashwanth krishnan B

Learned a lot. Krishna brother cleared all our queries... And also he taught us again from scratch.

Swathi A

All are good but the assigned trainer did not came for last two days and others were busy with other students so we couldn't do most of the part of our app.Please start from the scratch and then move on to the next part like implementing their abstract . They did not teach the basics

Siva Suriya S

This program helps me to gain knowledge about the android studio. Very helpful and friendly trainers but we want more innovative and technical support from college.

Mithileshan.M

It's one of the best experience of my life Since I have created my own app

Mrudhula M S

At first I thought I won't be able to develop an application but my team was the only one which presented the complete app. Though we cut off some features that we thought of doing but the time period was not enough. On the whole, BEST EXPERIENCE

Akshaya H

This event was really helpful for me. Before attending this workshop I don't have any major idea about Android studio but now I can be able to create an app. Every trainer helped us a lot till the last minute of the program. They shared as many information and gave more ideas about the app.
